Dubuque Airport Receives Grant

The Dubuque Regional Airport is the recipient of an Airport Geographic Information System (AGIS) Study grant. The grant is a pilot program with the Federal Aviation Administration.

The Dubuque Airport is scheduled to receive \$525,000 to fund airport imagery and data collection for uploading information into the FAA's Airports Geographic Information System (AGIS). This information will also contribute to the development of an electronic Airport Layout Plan (eALP).

The Dubuque Regional Airport has been working closely with Washington D.C. legislative offices and the Federal Aviation Administration to acquire this grant. We would like to thank Senators Grassley and Harkin as well as Congressman Braley for their assistance in obtaining this grant. Dubuque was one of several airports applying for this FAA pilot program and one of only two airports in the Central Region to receive it.

For additional information please contact Todd Dalsing at 563-589-4128.
