# NEWS RELEASE

November 10, 2010 – For Immediate Release

## **Dubuque Honored at International Awards for Livable Communities**

DUBUQUE, Iowa -- Dubuque was named a third-place finalist and gold-standard community at the International Awards for Livable Communities (LiveCom), held in Chicago, November 4-8.

Finalists were divided into five categories according to their average daytime population. Dubuque was the highest-ranked American city in the “whole city” award category for communities with populations up to 75,000. Along with its third place finish behind Chrudim, Czech Republic, and Porirua, New Zealand, Dubuque was also named a gold-standard community.

Criteria for the award were based on each community’s demonstration of enhancement of the landscape, heritage management, environmentally sensitive practices, community sustainability, healthy lifestyles, and planning for the future.

The LivCom Awards, launched in 1997, are endorsed by the United Nations Environment Program and are the world’s only awards competition focusing on best practice regarding the management of local environment. The objective of LivCom is to improve the quality of life of individual citizens through the creation of “livable communities.”

# PRESS RELEASE

DATE: 8th November 2010

EMBARGO: 00:01 9<sup>th</sup> November 2010

Chicago, USA

## **‘World’s best communities 2010’ named at UN-backed global awards event**

THE achievement of local community leaders in tackling the world’s most pressing challenges was saluted yesterday (Monday, 8<sup>th</sup> November 2010).

Communities from around the world that have made significant breakthroughs in addressing issues ranging from pollution to conservation and poor housing were named at the annual finals of the International Awards for Liveable Communities (LivCom) held in Chicago, USA (4-8 November).

The UN-endorsed LivCom awards annually bring together some of the world’s leading innovators in the field. This year’s finalists included representatives from some of the smallest communities on the planet, (Emly, Republic of Ireland Popn 900) to some of the very largest (Medellin, Colombia, Popn 3.8million).

After initial judging, presentations from finalists scattered across the globe were assessed by the awards panel. The focus is on six key criteria for both projects and communities which had to show strong evidence of the following; Enhancement of the Landscape, Heritage Management, Environmentally Sensitive Practices, Community Sustainability, Healthy Lifestyles and Planning for the Future.

The finalists are divided into five categories according to their average daytime population. In addition there are winners in categories covering specific projects as well as the award of a £10,000 bursary for the most inspiring and innovative project.

The winners in the “whole city” section judged as the world’s most liveable communities across the six criteria were Emly, Republic of Ireland (population category up to 20,000), Chrudim, Czech Republic (up to 75,000), Norwich, England (up to 200,000), Odense (up to 750,000) and Wuxi, China (over 750,000).

An award was also given for outstanding achievement in each of the six criteria, recognising particular innovation and best practice in the field. The winners showing outstanding achievement in each area were, Odense, Denmark (Enhancement of the Landscape), Dongcheng, China (Heritage Management), Wuxi, China, (Environmentally Sensitive Practices), Porirua, New Zealand (Community Sustainability), Portland, USA (Planning for the Future) and Chrudim, Czech Republic (Healthy Lifestyles).

Commenting on the success of this year's event, Claudette Savaria (Can) Chairman of the judging panel said: "As in previous years, the awareness and standing of the awards has spread further around the world with not only an increased number of entries but the participation of communities from countries such as Brazil, Colombia, the Philippines, Ukraine and Russia with some entering for the first time.

"A number of very strong themes emerged during the community presentations. Every city around the world is currently facing economic pressure and the most successful communities we saw here are those that are actively contributing to the growth of their local economy by embarking on the development of the green economy.

"Health issues are of growing importance. Many communities have programmes designed to meet the challenges of promoting healthy minds and bodies.

"Increasingly, communities are adopting the LivCom lifestyle judging criteria as a basis for their local healthy lifestyle plans.

"Climate change and carbon footprint issues are clearly high on the agenda of local communities and it is possible that it is at local level rather than federal issue that a breakthrough in this vital issue will come."

Chief Executive of LivCom, Alan Smith said of this year's finals: "We've had a wonderful welcome from Mayor Richard Daley and the people of Chicago, who have made every effort to make LivCom delegates welcome.

"It is striking that the communities entering the LivCom Awards are setting the agenda in initiating change.

"It is also clear that previous finalists are learning from the LivCom experience and exchange of ideas and that this is benefiting their residents.

"Whereas 10 years ago the focus was all about recycling, that is now taken for granted – the leading exponents of change have all moved on to devising more intricate solutions to complex issues."

LivCom 2010 highlighted the way in which many municipalities have moved to adopt global targets such as reducing carbon emissions and come up with a range of answers from high tech solutions to individual behavioural change.

One award winning project from Johannesburg, South Africa highlighted efforts to green the city to contribute to global climate protection.

Project judge Gus Stahlmann (USA) said the award winning project had impressed the judges because of its impact on daily lives. "The Greening the City Legacy Project seeks to balance the distribution of the urban forest throughout the entire city, bringing a green environment to the entire population of Johannesburg."

The full results, citations and photographs of the winners are available on the website at [www.livcomawards.com](http://www.livcomawards.com).

**Special project:**

1. Norwich, Norfolk, England – Heavenly gardens

**Bursary winner:**

1. Ivano-Frankivsk, Ukraine – creating a safe and friendly environment

\* The colour of an award DOES NOT indicate the communities final placing – it is a standard. So Gold is excellent but DOES NOT mean first place – it is possible to come 2<sup>nd</sup> and win a Gold award.

**About LivCom**

The LivCom Awards were launched internationally in 1997 and are endorsed by the United Nations Environment Programme and the scheme is run as a UK Registered Charity.

LivCom Awards are made in three categories covering Whole City, Sustainable Projects and a Bursary Award which sees match funding of £10,000 go to the winning project.

A new country has been represented at the LivCom Awards in each of the past eleven years, and now more 50 countries are regularly represented.

The International Awards for Liveable Communities 2010 were held at the Hilton Hotel, Michigan Av, Chicago, Illinois, USA.

**To find out more about the awards and for a full list of finalists, results and summaries of submissions, go to [www.livcomawards.co.uk](http://www.livcomawards.co.uk) or contact the LivCom press office at [e.peplow@btinternet.com](mailto:e.peplow@btinternet.com) (tel +44 7825082595).**
