**July 16, 2013 – FOR IMMEDIATE RELEASE**

## **City Hall Tuck Pointing Project Progresses to North Side**

DUBUQUE, Iowa – City Hall’s north entrance on Iowa Street will be closed for approximately six to seven weeks starting July 17 to complete the next phase of a tuck pointing project. This will impact several metered parking spaces along 13<sup>th</sup> Street and limit public use of the payment drop box during business hours.

Tuck pointing is being finalized on City Hall’s west side and the ADA-compliant west entrance is scheduled to reopen on July 17. Metered parking spaces will also open along the south side of City Hall at that time. Contractors will begin work on the south side of the building by mid-August, which will impact parking in the City Hall lot for the final six to seven weeks of the project.

The tuck pointing project at Dubuque’s City Hall began April 29, starting with the east side, as preventative maintenance to the 156-year-old building. R&W Restoration of Dubuque is the project contractor and was the lowest bidder on the project, at \$188,000. The tuck pointing project includes mortar joint and brick repair and replacement as well as window sill repair and replacement.

For more information, please call the City of Dubuque Building Services Department at 563-589-4150.
