NEWS RELEASE

April 16, 2015 – For Immediate Release

Asbury Road Pavement Project to Begin in May

DUBUQUE, Iowa – The City of Dubuque will be conducting a pavement rehabilitation project on the section of Asbury Road between Matthew John Drive and J.F. Kennedy Road. The contractor, Iowa Erosion Control, Inc., plans to begin work on Monday, May 4.

Over the past few years, the condition of this section of Asbury Road has degraded due to deterioration of pavement joints. Full-depth pavement patching and dowel bar reinforcement repairs will be made to transverse joints as part of the rehab project. Once pavement repairs are made, the concrete pavement will be resurfaced using a grinding method to provide a smoother ride.

The project is anticipated to be completed by July 3, 2015, weather dependent. No road closures or detours are anticipated, as one lane of eastbound traffic and one lane of westbound will flow at all times. City staff and Iowa Erosion Control, Inc. will work with businesses and residents on accessibility to their respective properties during construction.

On Tuesday, April 21, the City will host an informational meeting from 5–6:30 p.m. at the Tri-State Independent Blind Society, 3333 Asbury Rd. All general public, businesses, and residents along the project corridor are invited to attend to learn additional details and to ask questions.

Beginning Monday, May 18, and occurring every two weeks thereafter throughout the project, the City will hold construction progress update meetings for the general public, businesses,

and residents. These meetings will be held at Tri-State Independent Blind Society during the lunch hour, 12–1 p.m. Meeting dates include May 18, June 1, June 15, and June 29.

For more information, questions, or concerns, please contact the City of Dubuque Engineering Department at 563-589-4270.
