Oct. 18, 2016 – For Immediate Release

Green Receives Outstanding Service Award

DUBUQUE, Iowa – The American Water Works Association-Iowa Section (AWWA-IA) has awarded its 2016 Award for Outstanding Service to AWWA-IA to City of Dubuque Water Department Manager Bob Green. He received the award at the 101st AWWA-IA Annual Conference in Altoona, Iowa, on Oct. 5, 2016.

The Outstanding Service Award recognizes AWWA-IA members for outstanding service to the association through leadership and active participation in AWWA-IA section programs. Recipients exemplify the best in the water industry by continually bringing credit to the profession and the water community.

Green joined the City of Dubuque staff in June 1992 and supervises the City's water treatment and water distribution operations. His professional background includes positions as assistant superintendent of water distribution for Orange County Public Utilities, Orlando, Fla.; water distribution manager for the City of Mason City, Iowa; and water distribution manager for Mahaska Rural Water, Oskaloosa, Iowa. Green completed coursework in chemistry and water system hydraulics from the University of Iowa and Iowa State University. He holds a Grade IV Water Treatment and Grade IV Water Distribution License with the State of Iowa.

Green has served as the Iowa American Water Works Association Region I Chairperson, Iowa American Water Works Water Utility Council Chairperson, and board member of the Iowa Section of the American Water Works from 2006-2012, serving as chair in 2011. He has also been a conference speaker on the state and national level for the American Water

Works Association.

“Bob is more than deserving of this award,” said AWWA-IA Executive Director Dave Scott. “He has provided service and leadership to the Iowa Section since becoming a member through his tireless participation and leadership at both the state and regional levels.”

The Iowa Section of the American Water Works Association is comprised of drinking water professionals and water quality advocates dedicated to the promotion of quality drinking water for the citizens of Iowa. Its purpose is to support its members and young professionals, to influence other stakeholders through accurate and balanced educational forums, communication and support of technical, legislative and regulatory activities.
