As the 13th Administrator of the U.S. Environmental Protection Agency (EPA), it is my pleasure to congratulate the 2013 winners of the National Award for Smart Growth Achievement. This year’s winning projects show that smart growth approaches are having a visible impact on communities across the country—large and small, cities and suburbs, towns and rural places. They show that the choices communities make about how they develop can protect people’s health and the environment while contributing to local economic growth. Most importantly, they show other communities that the path to a sustainable future is just around the corner.

One of my major commitments at EPA is to make a visible difference in America’s communities. We want to support communities that are fostering healthy local economies and strong neighborhoods through strategies including using green infrastructure to manage stormwater, prioritizing cleanup and redevelopment of hazardous brownfield sites, providing transportation choices that reduce air pollution, and considering the impacts of development decisions on all community members. I am proud to say that our 2013 winners have masterfully employed these techniques and more. They have developed and implemented creative, flexible, and sustainable smart growth solutions that will curb carbon pollution, protect public health, and safeguard the environment.

President Obama and I know that smart growth strategies are smart for the environment, smart for our economy, and smart for our communities. Please join me in once again congratulating the winners of the 2013 National Award for Smart Growth Achievement and the communities they represent.
Corridor or Neighborhood Revitalization

Historic Millwork District and Washington Neighborhood

Once a bustling center of regional economic activity, Dubuque, Iowa’s Millwork District sat vacant for decades after it fell victim to the economic shifts that touched much of the Midwest in the mid-1900s. The adjacent Washington Neighborhood was affected by the Millwork District’s decline, facing disinvestment and neglect when the mills began to shutter their doors and residents moved away from downtown. Today, thanks to strong community partnerships, public engagement, and an overarching citywide commitment to sustainability, Dubuque is successfully restoring both the Millwork District and Washington Neighborhood to the vibrant neighborhoods they once were.

In 2006, Mayor Roy D. Buol and the Dubuque City Council identified sustainability as their top community priority, prompting a citizen task force to create a new sustainability initiative—Sustainable Dubuque. Reinvestment in Dubuque’s historic Millwork District and neighboring Washington Neighborhood were key to the community’s plan.

The Millwork District covers 11 city blocks, including more than 1 million square feet of formerly vacant warehouse space, and sits prominently between Dubuque’s downtown core and the Mississippi River. Its redevelopment builds upon the city’s sustainability vision and capitalizes on the district’s existing assets to create a compact, walkable environment where over 1,000 new residents will inhabit the refurbished warehouses. The rehabilitation of the anchor building—the old Caradco factory—is already complete. The building incorporates a variety of retail, commercial, social, art, and civic spaces, which has brought culture and vibrancy back to the area. This type of multi-use development is the model for the district’s future growth. The district includes innovative green infrastructure and energy-efficiency technologies to improve environmental quality and public health for the neighborhood’s residents and Dubuque as a whole.

The Millwork District’s success directly affects the revitalization of another central Dubuque neighborhood. The adjacent 128-acre residential Washington Neighborhood, one of the city’s oldest and most economically challenged areas, has used the progress made in the Millwork
District to catalyze its own redevelopment. No longer geographically cut off from downtown by vacant factories, Washington Neighborhood residents can now easily walk, bike, or ride the bus to Dubuque’s central business area, including the retail and social services in the Caradco Building. As part of the citywide sustainability initiative, community groups in the Washington Neighborhood, many of which have office space in the Millwork District, have restored dozens of homes, providing downtown housing options. Other projects in the neighborhood, including community gardens, parks, and public art, have improved quality of life for residents. The community has also reduced the flood risk to over 1,100 flood-prone properties by “daylighting” Bee Branch Creek, uncovering and redirecting the creek so that it now flows above ground. By restoring the creek to its native path, the city avoided having to spend millions of dollars to build new storm sewers because the creek performed the same function in a natural way. Daylighting the creek not only saves money but provides residents of nearby neighborhoods an attractive community park.

The goals of Sustainable Dubuque have come alive through these revitalized central neighborhoods. The converted Caradco Building and surrounding streetscape combine environmentally friendly technologies and complete streets with the reuse of existing assets—an inherently sustainable approach. A renewed feeling of community has emerged as a result of the Millwork District’s focus on the arts through festivals, classes, and gallery space. The mixed-income apartments and single-family homes in both neighborhoods bring people from all socioeconomic backgrounds together downtown. By catalyzing redevelopment of these great places, Dubuque demonstrates that nothing is more sustainable than strengthening existing neighborhoods.

“I have lived in this neighborhood since I was 8 years old. I have seen what it was, and I can honestly say that with the programs and projects in place, I have never seen the homes and neighborhood look so good.”

— Gary Carner
Washington Neighborhood Resident
Past Winners

**ARIZONA**
- City of Tempe—Smart Growth and Green Building (2009)

**CALIFORNIA**
- City of Pasadena Planning and Development Department—Policies and Regulations (2005)
- City and County of San Francisco—Civic Places (2010)
- San Francisco Housing Authority and Mercy Housing California—Equitable Development (2008)
- City/County Association of Governments of San Mateo County—Policies and Regulations (2002)
- City of Santa Cruz Department of Housing and Community Development—Policies and Regulations (2004)
- Department of the Navy—SW Division (San Diego)—Built Projects (2003)
- City of Lancaster—Overall Excellence (2012)
- Metropolitan Transportation Commission (Bay Area)—Programs and Policies, Honorable Mention (2012)

**COLORADO**
- Town of Breckenridge Planning Department—Built Projects (2002)
- Denver Urban Renewal Authority—Overall Excellence (2005)
- City of Lakewood and Lakewood Reinvestment Authority—Built Projects (2005)
- Denver Housing Authority—Equitable Development (2012)
