# Rack & Ride

## STEP 1 LOWER THE RACK

Squeeze the handle and lower the rack. If another bike is in position, the rack will already be lowered. If the bike rack is full, please wait for the next bus.

## STEP 2 PLACE BIKE IN RACK'S WHEEL WELL

If yours is the only bike being loaded, place in the position nearest the bus.

## STEP 3

### SWING THE BIKE SUPPORT ARM UP

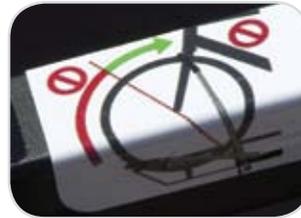

Swing the bike support arm up after you place your bike in the rack. The support arm faces down when not in use.

## STEP 4

### A SPRING WILL PULL SUPPORT ARM BACK

A spring will pull support arm back and hold your bike securely.

## STEP 5

### YOU'RE READY TO RIDE!

Board the bus and pay your fare. Your bike rides FREE!

## STEP 6

### EXITING THE BUS

When you come to your stop, exit by the front door, and tell the driver that you'll be taking your bike off. If there isn't another bike in the rack, return the bike rack to the folded position.

## Rules

- All cyclists are responsible for loading, securing, and unloading the bike from the rack. For safety reasons, the driver cannot get off the bus to assist in loading or unloading bikes.
- Never step into traffic while loading or unloading your bike.
- Never cross the street in front of the bus; passing traffic can't see you around the bus.
- If an object rolls under the bus, NEVER try to get it. Tell the driver and wait for the bus to pull away, and then retrieve it.
- Make your bike "rack ready" by removing water bottles, pumps, or any loose items that may fall off, before loading your bike.
- Tandem bikes, bikes with gas or electric motors, solid wheels, large racks, child seats, or other attachments are not allowed.
- Bikes left on the bus may be claimed by calling 589-4196. Bikes will be held for 30 days. Unclaimed bikes will be given to local charities.

*The Jule and the City of Dubuque assumes no responsibility for damaged or lost bikes as a result of using the racks. Use of bike racks is at your own risk.*
