

TO: The Honorable Mayor and City Council Members

FROM: Michael C. Van Milligen, City Manager

SUBJECT: Consulting Engineering Services for the 17th Street/West Locust Street Storm Sewer Improvements Project and the 22nd Street/Kaufmann Avenue Storm Sewer Improvements Project [CIP #264-2690]

DATE: June 14, 2017

Seven proposals were submitted in response to the HUD Resiliency Infrastructure Project Request for Proposals. The RFP Review Committee reviewed the proposals and selected four firms for interview. Following the interviews, the RFP Review Committee considered the strengths and weaknesses of the teams and ranked them. By a unanimous consensus, the committee deemed IIW to have submitted the top proposal.

City Engineer Gus Psihoyos requests City Council approval to negotiate and enter into a contract for IIW, PC to provide engineering services for the 17th Street/West Locust Street Storm Sewer Improvements Project and the 22nd Street/Kaufmann Avenue Storm Sewer Improvement Project, both associated with the Community Development Block Grant Program Disaster Recovery - National Disaster Resiliency funds for the Bee Branch Watershed Flood Mitigation Project.

I concur with the recommendation and respectfully request Mayor and City Council approval.

Michael C. Van Milligen
