

**FY2020
CITY OF DUBUQUE
PUBLIC WORKS DEPARTMENT
SNOW AND ICE CONTROL MANUAL**

A Policy for the control and removal of snow
and ice accumulations on the City of Dubuque's
highways, roads and streets.

CITY OF DUBUQUE
SNOW AND ICE CONTROL PROGRAM
REVISED – November 2019

Section No. 1 SCOPE OF PROGRAM - INTRODUCTION

The control of accumulations of snow and ice on the public ways of the City of Dubuque is the responsibility of the Public Works Department.

Snow and ice control is emergency work and is accomplished as efficiently and expeditiously as possible with the resources available to City government. A combination of many factors interact to make each snowfall and the effects of each such snowfall unique. Consequently, the snow and ice control plan for the City must be flexible enough to cope with and respond to varying conditions during and after each winter storm.

The snow and ice control program as set forth on the following pages reflects constant changes in methods of operations, plow and deicer routes, streets, equipment and other facets of the program. Equipment and personnel noted by this program may be supplemented with equipment and personnel from other departments or hired from the private sector.

The snow and ice control program specifies that all improved streets within Dubuque's city limits will be plowed and receive applications of salt, salt brine, blended liquid deicer, crushed limestone, sand, and/or non-corrosive deicer when necessary before, during and after a winter snow or ice storm. Improved streets mean all publicly-owned streets with a hard surface, regardless of type. Alleys are not included in the program, with the exception of those in the downtown business district and those few hard-surfaced alleys that serve as sole access to a residence (as authorized prior to 1990 or by City Council action).

Because of the high cost associated with removal operations, large snow accumulations will be removed only when necessary from improved streets, alleys and municipal parking lots in the downtown district and the Port of Dubuque.

Snow accumulations may also be removed from heavily traveled arterial streets as time and budget constraints permit. Any removal operations performed on arterial streets are for the purpose of facilitating the safe and proper flow of vehicular traffic only. Every April, the Public Works Department will evaluate its remnant salt supply. If additional salt is determined to be needed, the Public Works Department will solicit bid proposals for snow and ice control road deicer salt in May or June for the following winter season. Salt will be purchased by the barge load, unloaded at the City of Dubuque's Purina Drive barge terminal by November 15th, and placed in the salt storage fabric building on site until removed by the City of Dubuque and its purchase partners. Off season direct purchases from a company already storing salt in Dubuque is sometimes an option. In that case, the salt is then purchased and moved to the City's storage facility in April of each year.

Section No. 2 SNOW AND ICE CONTROL OPERATIONS

During a winter storm, fourteen (14) City plow/spreader trucks will be dispatched when necessary to plow and treat Dubuque's streets. Each truck is assigned to one of fourteen (14) zones or routes into which the City is partitioned.* If snowfall accumulations are in excess of six (6) inches, motor graders and plow-equipped wheel loaders may be dispatched to assist with plowing operations. Contingent upon pavement conditions at the time of deployment, these plows will be assigned to one of the heavy plow routes. The current budget provides that all improved streets are to be cleared for vehicular travel within forty-eight (48) hours of the cessation of a winter storm.

*Within these zones and routes, primary streets will be plowed and treated continuously until they are open for vehicular traffic. Then the secondary streets will be plowed and treated. Finally, all other streets in each zone or route will be opened for vehicular travel.

Section No. 3 OFFICIALS IN CHARGE

Officials in charge shall be:

Public Works Director

Assistant Public Works Director

Public Works Field Supervisor

Supervisors designated by the Public Works Director

Section No. 4 DETAILS OF PREPAREDNESS

A call list shall be completed and distributed by November 1st each year. The list will state:

- 1) Names and phone numbers of City snow and ice control personnel;
- 2) Routes or zones the personnel are assigned to;
- 3) Twelve (12) hour shifts personnel are assigned to;
- 4) Salt Operations Handling Contact Numbers.

A call list of names and phone numbers of private sector heavy-plow contractors will be completed by November 23rd each year.

All City snow and ice control personnel will have completed their orientation and training by November 15th and all appropriate trucks, heavy equipment and machinery will have been made ready for operation at that time.

Section No. 5 SNOW WARNING AND ALERTING PROCEDURE

A private meteorological firm shall be retained annually to supplement the forecasts received from the National Weather Service Office in Davenport, Iowa. This is due to the need for a twenty-four (24) hour monitoring and notification service. At the present time, DTN is that private firm. It provides forecasts each day, seven (7) days a week, with additional updates when warranted. These forecasts are received through Weather Sentry Online Pavement Forecast Transportation Edition, a web site hosted and maintained by the vendor. The forecasting service provides alerts to desktop or mobile devices, online weather briefing, pavement temperature and treatment recommendations. At that time Public Works Department snow and ice control personnel are alerted. This web based service is made available to all Public Works personnel with an available internet connection.

Section No. 6 TRUCK PLOW/SPREADER OPERATIONS

From approximately November 15th through April 1st, twenty-eight (28) Public Works Department personnel are assigned as plow/spreader truck operators. Shift start and end dates are subject to change each year. The Public Works Director will authorize the start and end of each shift each season. These operators are assigned to either the 4 AM to 12:00 noon or 12:00 noon to 8:00 PM work shifts. The 4 AM to 12:00 noon operators are responsible for operating the trucks during the AM hours between midnight and noon during the winter months. The 12:00 noon to 8:00 PM operators are responsible for the PM hours between noon and midnight.

As soon as conditions warrant at the inception of a winter storm, the fourteen (14) plow/spreader truck operators are dispatched onto their zones/routes. During normal work hours, this decision is made by the Public Works Director or other authorized Public Works supervisors. During the night and on holidays and weekends, the Public Works Director or other authorized supervisors receives input from the Police Department, which aids in determining when to dispatch the operators.

The Public Works Director or supervisors determine what types of materials will be spread on Dubuque's streets. Their decision is based on variables such as air temperature, pavement temperature, type of precipitation, wind, and forecasted post-storm air temperatures. Due to extremely cold pavement temperatures or other uncontrollable weather conditions, ice or snow may remain on driving surfaces after all operations have ended. Also, any new concrete streets judged as susceptible to damage from deicers may receive limited deicer treatments, or be treated with a liquid low-corrosive deicer or abrasive materials. These streets will be noted on their respective routes. Usage of limited deicers or abrasives may result in snow and ice covered driving surfaces on the new concrete streets, even after normal operations have ended.

Normal Winter Pavement Conditions - Examples of pavement conditions drivers may encounter during and after a winter storm events

Pavements 100% Snow Covered

Driving lanes plowed with limited open driving lanes

Entire street plowed with driving lanes treated

Residential street plowed and treated with areas of snow pack remaining

A.M. PLOW/SPREADER TRUCK CREW

Crew Leader: Bob Barry

Section No. 7 SNOW PLOW OPERATIONS

If snowfall accumulations are in excess of six (6) inches on street surfaces, motor graders and plow-equipped endloaders are usually dispatched to assist with plowing operations. If needed, these plows will first help clear the primary and secondary streets. After those streets are open for vehicular traffic, the plows will then be dispatched to clear the streets listed on the sixteen (16) general plow routes. In the event of a severe winter storm, Public Works Department plows and personnel will be supplemented with equipment and operators from other City departments (see Section No. 21). If budget constraints allow, plows and operators may also be hired from the private sector.

Public Works Department equipment available for snow plowing operations:

Motor Grader - # 3226

Wheel Loaders - # 3209, 3235, 3244, 3250, and 3255

Unit # 3201 - 31,000 GVW dump truck with front mount snow blade, flat box conveyor spreader, and slide-in liquid anti-icing Unit

Unit # 3203 - 31,000 GVW dump truck with front mount snow blade, underbody snow/ice blade, flat box conveyor/spreader and liquid anti-icing unit

Unit # 3205 – 31,000 GVW dump truck with combination material spreader box with front mount snow blade

Unit # 3231 - 15,000 GVW dump truck with combination material spreader box and front mounted snow blade

Unit # 3101 – ¾ ton 4x4 pickup with 8' snowplow

Section No. 8 VEHICLE PARKING AND TOWING

In order to facilitate snow plowing and removal operations in the downtown area, Section 9-14-321.627 of the Code of Ordinances provides for alternate-side street parking on most downtown streets. This section also authorizes ticketing and/or towing and impoundment of vehicles parked in violation of this restriction.

Section 9-14-321.682 provides for odd/even parking on the following posted snow routes during designated times:

E. 22nd from Windsor to Central	Kaufmann Avenue
E. 32nd from Jackson to Central	Kelly Lane
W. 32nd from Central to Fink	Loras Boulevard
Alta Vista from University to Kirkwood	North Grandview
Asbury Road	Old Mill Road
Bryant Street	Pennsylvania Avenue
Cedar Cross Road	Rhomberg Avenue
Central Ave from 22 nd to 32 nd	Rockdale Road
Clarke Dr from W. Locust to Asbury	South Grandview
Delhi Street	University Avenue
Fremont Avenue	West Locust from W17th to Clarke Drive
Hill Street	Windsor Avenue
Kane Street	Wooden Street
E. 24th Street	

Section 9-14-321-681 of the Code of Ordinances prohibits the parking of vehicles on any designated streets in the City if such parking interferes with the plowing or removal of snow or ice when a snow emergency has been declared. Section 9-14-321.685 of the Code of Ordinances authorizes the towing and impoundment of vehicles parked in violation of any proclaimed snow emergency.

Sections 9-15-321.770, 9-15-321.771, and 9-15-321-772 of the Code of Ordinances set forth the towing and storage procedures for impounded vehicles. Section 9-14-321-621 of the Code of Ordinances provides a schedule of fines for the parking of vehicles that interfere with snow or ice removal activities.

Section No. 9 SNOW AND ICE REMOVAL OPERATIONS

Because of the high costs associated with removal operations, snow accumulations will be removed only when necessary from streets, alleys and municipal parking lots in the downtown district and the Port of Dubuque. Snow accumulations may also be removed from heavily-traveled arterial streets, as time and budget constraints permit. Any removal operations performed on arterial streets are for the sole purpose of facilitating the safe and proper flow of vehicular traffic.

Snow removal operations in the downtown district shall generally be performed at night in order to avoid heavy traffic and congested parking. Snow removal operations on arterial streets shall generally be performed during the day in order to accommodate the residents on those streets. Rotary snow blowers, endloaders, motor graders, backhoe-loaders, and dump trucks shall be used for such operations. Private equipment and operators may be hired to assist in such operations, but only when deemed necessary.

When necessary, snow will be removed from cul-de-sacs and ice accumulations from streets to facilitate future snow plowing operations.

Snow may also be removed from any residential street, with the City Manager's approval, for the sole purpose of facilitating the safe and proper flow of emergency and other vehicular traffic.

Section No. 9 (continued) SNOW REMOVAL OPERATIONS

First Priority Street Routes are as follows:

Main - 14th to 1st Street - except the plaza
Locust - Dodge to 14th Street
Bluff - 14th to Dodge Street
Central - 4th to 32nd

Ice Accumulations – Route 2

Section No. 10 MEDIAN CROSSOVERS

After all streets have been cleared for vehicular travel, median crossovers between the traffic islands on Grandview Avenue and Kerper Boulevard will then be plowed and treated. Major accumulations of ice and snow may be removed to provide adequate visibility for vehicular traffic when deemed necessary.

Section No. 11 PEDESTRIAN AND PARKING ASSIGNMENTS

The Public Works Department is also responsible for the control and removal of ice and snow accumulations from most City-owned walks, steps, traffic islands, pedestrian overpasses and municipal parking lots. The current budget provides that these pedestrian and parking facilities will be cleared within seventy-two (72) hours of the cessation of a winter storm.

Municipal Parking Lots

Lot Number	Lot Description
#02	9 th and Bluff - Lot north side of W9 th and west of Bluff.
#03	5 th and Bluff - Lot north of W5 th and west of Bluff.
#04	Twelfth Street and Bluff Street
#05	Twelfth Street and Central - Lot bounded by W12 th , W13 th , Central and Iowa.
#06	Eleventh and Bluff Street - Lot south of W11 th and west of Bluff.
#07	Third and Main - Lot bounded by 3 rd St, Main St. and alley east of Locust
#08	Historic Federal Building – south side of the building
#09	Third and Locust – lot located on the south of Third and east of Locust
#10	W 5 th and Main Street – lot located on the west side of Main and south of W 5 th
#12	Fourth Street and Central - Lot bounded by Central Ave., 4 th St. and west of White St. under HWY 151/61 freeway.
#13	18 th & Elm Street – Community Health Center Lot – east side
#21	Elm Street – between 11 th and 12 th

At this time all parking lots listed are plowed by a private contractor plowing service and deiced after snow plowing is completed.

Port of Dubuque

All paved parking areas of lot #1, lot # 2A, lot #2B lot #3 and lot #6 located in the Port of Dubuque. Also the Port of Dubuque Surface Lot – west of McGraw Hill (must be completed by 6AM and 3PM).

Accessible Parking Stalls at Public Facilities

City Hall - one located in the metered area of the Parking Lot and another in the alleyway near Iowa Street.

City Hall Annex - mid-block on the north side of 13th Street between Main and Iowa.

Library - one located on the southeast corner of 11th St. between Bluff and Locust and another located on the northwest corner of Locust between 10th & 11th Streets.

Fire Headquarters - located in the parking lot

Five Flags - one located mid-block on the west side of Main St. between 4th & 5th Streets and another on the southeast corner of Locust between 4th & 5th Streets.

Historic Federal Building – SE Corner of 6th & Bluff, NW corner, 6th & Locust, NW and SE corner of Bluff & 6th.

Mystique Ice Center

The Public Works Department will remove snow from the parking lot located at the Mystique Ice Arena, as needed, after snow removal is completed in the downtown, Historic Mill Work District and Port of Dubuque areas. On game days plowing and deicing operations will be completed by 5:00 pm on the three other parking lots located in various areas along Admiral Sheehy Drive by the Park Department.

	Main - Locust - 10th - 17th
	Bluff - Locust - 8th - Dodge
	Bluff - Locust - 10th - 11th

Section No. 13 CATCH BASINS

Stormwater catch basins located along arterial streets and/or in key drainage areas will be opened within a reasonable time following snowfalls, if temperatures over 32 degrees Fahrenheit are expected soon thereafter. Timing will depend to a great extent upon short-range weather forecasts. Critical catch basins are located along:

Bryant Street	Pennsylvania Avenue
Eighth Street	Hillcrest Road
University Avenue	Asbury Road
Loras Boulevard	Central Avenue
West Locust Street	Jackson Street
Kaufmann Avenue	Washington Street
Elm Street	JFK Road
Windsor Avenue	White Street
Rhomberg Avenue	17th Street
Broadway Avenue	Grandview Avenue
East 22nd Street	Locust Street
Iowa Street	Main Street
Kerper Boulevard	9th Street
	E 11th Street

Section No. 14 SNOW AND ICE CONTROL RECORDS

The following records shall be kept for every winter storm:

- 1) Storm Data:
 - a) Date,

Section No. 15 TRAINING PROGRAM

In November of each year, all employees of the Public Works Department shall be briefed on the operations of the Snow and Ice Control Program. Discussions shall concern the operations as designed, assignments of operators for all equipment, and revisions made to the previous year's program. Training of new employees will be done at this time. All employees will be trained in the operation of any new equipment. Dry practice runs will be done by all employees on their assigned routes.

Section No. 16 ZONE AND ROUTE MAPS

Electronic maps are maintained at the Public Works Department offices which display:

- 1) Plow/Spreader Truck Zones;
- 2) Primary Plow/Spreader Truck Routes; and
- 3) Plow/Spreader Pickup Truck Routes.

These maps shall be revised each year to reflect new streets, special assignments and/or general restructuring of zones or routes.

Section No. 17 WINTER STORM EMERGENCY

The Public Works Director shall advise the City Manager whenever non-emergency travel is to be discouraged. The City Manager is authorized to publicly announce such road conditions (Section 9-14-321-683).

**Section No. 18 28E AGREEMENTS WITH DUBUQUE COUNTY
AND THE CITY OF ASBURY**

A 28E agreement exists between Dubuque County, Iowa and the City of Dubuque, Iowa in accordance with the provisions of Iowa Code Section 28E (1998). The purpose of this agreement is to define the duties and responsibilities of Dubuque County and the City of Dubuque for snow and ice control on roads within the jurisdiction of both public agencies.

A 28E agreement also exists between the City of Asbury, Iowa and the City of Dubuque, Iowa in accordance with the provisions of Iowa Code Section 28E (1998). The purpose of this agreement is to define the duties and responsibilities of the City of Asbury and the City of Dubuque for snow and ice control on roads within the jurisdiction of both public agencies.

Section No. 19 ANTI-ICING

Anti-icing is the snow and ice control practice of preventing the bonding of the initial snow and ice precipitation to street pavement through the timely, pre-storm application of a chemical freezing-point depressant.

When the Public Works Director determines that conditions are favorable for the use of this anti-icing technology, a liquid deicer will be sprayed on the streets to prevent the bond of snow on the pavement. The snow manual lists streets that may be treated prior to the storm if conditions are favorable. In the event when conditions are not favorable for the use of this technology, conventional deicing techniques will be used.

Section No. 20 DEPARTURE FROM POLICY

The City of Dubuque, Iowa recognizes that winter conditions vary from year to year and from storm to storm. Consequently, when conditions warrant, the Public Works Director may order a departure from the snow and ice control and removal policies as stated in this manual in order to adjust to existing conditions. Such a departure shall be done only, except in the case of an emergency, after authorization by the City Manager. Any such deviation from the general policy will be appropriately recorded.

Section No. 21 AUXILIARY PLOW FLEET

When a snow accumulation is forecasted to exceed eight (8) inches, or when other conditions warrant, the City Manager may order that all City-owned vehicles equipped with snow plows report to the Public Works Department for plow route assignments. This auxiliary plow fleet will be assigned to residential street plowing with the sole purpose of providing access to residential areas during major winter storms. Each department providing a supplemental snow plow vehicle will also provide an operator for an initial twelve (12) hour shift and have a second operator available if a second shift is necessary. By November 15th of each year, departments equipped with snow plow units are required to provide the Public Works Department with a description of each unit and its two operators. The Snow and Ice Control Manual will be updated accordingly. Auxiliary plow operators will attend an annual snow plow training event conducted by the Public Works Department.

Listed below are the auxiliary plows available:

<u>Department</u>	<u>Operator</u>	<u>Unit Number</u>	<u>Description</u>
Park Division	Jeff Steuer Tim Neuhaus	4401	Pickup w/7' 6"
Park Division	Tim Lattner Chris Lahey	4402	Pickup w/8' 6"
Park Division	Jeff Ahlers Alec Leytem	4419	Pickup w/8' 6" V-plow

Section No. 22 SNOW STORAGE AREAS

Snow hauled from municipal parking lots, parking ramps, downtown alleys, and streets by City and contractor crews will first use the following areas for snow storage first:

Terminal Street City owned property – Snow removal principally from the City's Port of Dubuque areas, downtown streets, alleys, and parking ramp removal.

Miller Riverview Park – downtown streets, alleys, and parking ramp removal

Former Bowling and Beyond Parking Lots

Once the above areas are filled, snow will be hauled to the following locations:

Dodge and Locust – IDOT property (permission is necessary from IDOT)

Once the above areas are full, it would be necessary to negotiate with private property owners for snow storage space.

Section No. 23 Bus Stop Snow Removal

The Public Works Department will remove snow from the 34 most used stops bus stops, as identified by the transit department, when requested by the Transit Department. In addition, snow will be removed with-in 48 hours from any bus stop when a request is received from the Public.
